## X-RAY Perpetual Calendar: Measures eternal time with style!

Inspired by the historical design of the brand, the X-RAY Perpetual Calendar is the result of thorough aesthetic research and design evolution where traditional watch making and high tech style are perfectly merging, giving a unique and new vision of a watch of exception. X-RAY Perpetual Calendar raises again the main details proper to HYSEK's identity reinterpreted in a contemporary and modern style.

A deliberated choice of materials such as the 18k rose gold case, the double fold-over buckle in rubber with 18k rose gold H insert exclusive to the brand or the high quality black rubber flanges strengthen the singular and refined style of the watch. This timepiece presents a perpetual calendar function and a marvellous dial which lets appear the sophisticated and highly worked on movement thanks to some openings in the dial. This model is produced in 18k rose gold only and is a limited series. Months and bissextile leap year indication at 12 o'clock, date indication at 3 O'clock, day counter at 9 o'clock and second GMT indication at 6 o'clock. An exceptional watch in perfect continuity to HYSEK's style which measures the eternal time.
