

Chronomat B01 iPhone application

Using the specific features of the iPhone 3.0 version, Breitling offers the Chronomat B01 application for iPhone and iPod touch, designed to provide a functional and detailed presentation of its latest chronograph.

A precise description, technical data, a portfolio, a video and 360° views give an extremely clear idea of the exceptional nature of the new Chronomat B01.

The application is also equipped with a unique configurator serving to visualize hundreds of possible customized versions of the model.

The point-of-sale location-tracking system enables all devotees of mechanical chronographs to locate the nearest authorized Breitling retailers.
