

The watch summer of TF Est. 1968.

T-Fun Collection, colourful and bang-on-trend watches, genuine carbon finish.

The global brand **TF Est.1968**, a figurehead of flawless Swiss quality and affordable luxury, has launched T-Fun, a colourful, bang-on-trend collection of watches, available in 2 versions: a three-hand automatic (high-quality decorated Swiss movement) and a chronograph. Signature identity codes include dials and bezels sporting a genuine carbon finish and highly luminescent hands and logo...

Enjoying worldwide distribution thanks to its famous cufflinks housing a Tourbillon style watchmaking mechanism, the lifestyle brand TF Est.1968 has moved into the field of watchmaking armed with some highly convincing arguments and a particularly seductive colour palette, not to mention attention-grabbing aesthetics.

A member of the mechanical family, the T-Fun automatic, water-resistant to 150 metres, 45 mm in diameter

In an exceptional move for a mechanical timepiece available at an incredibly affordable price that will test anyone's powers of resistance, this T-Fun timepiece houses a 100% Swiss made decorated and circular-grained, Côtes de Genève finished three-hand automatic calibre. Personalised down to the surfaces of its oscillating weight, the movement is open to view through a transparent back. Fitted with a sapphire crystal with anti-reflective coating, water-resistant to 15 atm, the case crafted in 916L steel or 5N gold plate transcends even the eye-grabbing chocolate brown and apple green colour scheme, shot through with flashes of vivid orange or white. Genuine carbon coats the dial and the circular grained matching bezel. The virile screw-down crown, struck with the identity-rich TF logo, makes a proud linear statement.

> Swiss made automatic calibre,
Côtes de Genève finish and circular-grained
decoration, personalised oscillating weight
open to view through the transparent back.
Screw-down crown.

Interchangeable straps, the ultimate finishing touch. The models come with Two straps, one in felt-touch rubber bearing the TF stamp, rounded off with an Ardillon buckle sporting the TF Est. 1968 brand colours, the other a NATO style nylon strap. A ring echoing the chosen colour extends and highlights the bezel surround in a particularly attractive aesthetic touch. A great watchmaking success for a global lifestyle brand that stands out from the crowd. Sapphire crystal with anti-reflective coating, transparent back. Recommended retail price: CHF 1,450.00

T-Fun chronograph watches, sporty timepieces, 45 mm in diameter, bold colours, seductive aesthetics, water-resistant to 150 metres!!!
