## EPOS - Collection Sportive

The EPOS 'Collection Sportive' has been extended with the arrival of the 3389, a model that is available in three versions, reflecting the characteristic design of the highly successful Chronograph 3388 launched in 2007.

The EPOS 'Collection Sportive' has been extended with the arrival of the 3389, a model that is available in three versions, reflecting the characteristic design of the highly successful Chronograph 3388 launched in 2007. This avant-garde watch epitomises not only pure power, luxury and good taste but also strength and durability. The self-winding ETA 2824 mechanical movement comes in three versions, the 3389sk being particularly fascinating with the skeleton movement visible from the front through the open dial. These watches are supplied with a high quality stainless steel or rubber bracelet. The muscular 43 mm diameter case is PVD coated and has a sapphire crystal with screw-down bezel and carbon dial, as well as a see-through back revealing the movement. The overall impression is of a powerful luxury sports watch.

Collection Sportive, Ref: 3389
