

TISSOT

TISSOT - Veloci-T Lady

Tissot is committed to sharing the benefits of the new C01.211 ETA movement with both sexes and the new Tissot Veloci-T Lady seamlessly fuses femininity with dynamic performance.

Tissot is committed to sharing the benefits of the new C01.211 ETA movement with both sexes and the new Tissot Veloci-T Lady seamlessly fuses femininity with dynamic performance. A modern colour combination of white and rose PVD dresses this precision Swiss-made automatic chronograph immaculately. Lady wearers are happy to show their feminine side and are also visibly in touch with their time thanks to a round window on the case back revealing the innovative balance wheel. This watch perfectly mirrors the revolutionary new movement's capacity to simplify the beauty of true craftsmanship without compromising performance.

DEDICATED DESIGN DETAIL

The Tissot Veloci-T Lady pays tribute to the sporty roots of this popular range with intricate detail on the dial and bezel, as well as a comfortable, sculpted rubber strap. Circles framing the dial provide a timely reminder of the racetrack inspiration. A finely marked tachymeter effectively communicates the dedication to precision shared by top-level motor sport and fine watchmaking, while applied indices and a textured crown confirm a keen eye for detail. The Tissot Veloci-T Lady is set to accelerate straight into the fast lane of style and discerning taste.
