## VICTORINOX - Dive Master 500 BlackIce Chrono & Mecha

Precision timing meets diving in the new Dive Master 500 Black Ice Chrono, now equipped with a chronograph movement in the same ultra-rugged and highly functional 43 mm sport watch from Victorinox Swiss Army.

Precision timing meets diving in the new Dive Master 500 Black Ice Chrono, now equipped with a chronograph movement in the same ultra-rugged and highly functional 43 mm sport watch from Victorinox Swiss Army.

The 500 meters (50 ATM) water resistance, which gives its name to the Dive Master 500 line, is maintained in this chrono version through the screw-in caseback and the screw-down crown and pushers. The chronograph function features enhanced legibility and ease of use with central hands for the timing of seconds and minutes around the dial, and a separate 12-hour counter at 10 o'clock, with a date window and small second at 6 o'clock.

The mechanical version of the Dive Master 500 introduced last year is complemented this summer with a new model featuring an exclusive Deep Blue dial and matching Swiss-made genuine rubber strap, powered with a Swiss-made mechanical self-winding movement.

The trademark Black Ice PVD coating now extends to the entire Dive Master 500 collection, including the new quartz models with a redesigned and enriched dial taking cues from the mechanical models, and new half-opened luminescent hands.
