

EDOX

EDOX - X-TREME PILOT III, The New Bad Boy

Sportly in style, masculine and very "bad boy", with a black carbon dial, the new X-treme Pilot III Limited Edition is powered by a chronograph movement that is sturdy, shock-resistant and extremely reliable.

Sportly in style, masculine and very "bad boy", with a black carbon dial, the new X-treme Pilot III Limited Edition is powered by a chronograph movement that is sturdy, shock-resistant and extremely reliable.

The over-sized push-piece captures the attention, its electric green evoking the lights indicating the start of a race. Designed for WRC drivers, the watch is in ultra-light titanium and the movement rotated through 180 degrees, makes for instinctive and enjoyable use. As ever, the WRC collection features many inspired details: wheel rims embossed on the caseback, green oversize push-piece in anodised aluminium and a tachymeter scale on the dial.

The new X-treme Pilot III Limited Edition is a real tool for drivers. It is limited to 1000 exclusive pieces and comes in its personalised presentation box. Edox is the official timing partner of the World Rally Championships.
