HAMILTON - Jazzmaster Auto Chrono

The new Hamilton Jazzmaster Auto Chrono uses the latest innovations in watchmaking to improvise on the proven melody represented by its original version. Driven by the recently developed H-21 movement, this high-performance automatic chronograph can rely on 60 hours of power reserve.

Hamilton Jazzmaster Auto Chrono
Getting into the swing of sophisticated watchmaking

Biel, September 2012 - The new Hamilton Jazzmaster Auto Chrono uses the latest innovations in watchmaking to improvise on the proven melody represented by its original version. Driven by the recently developed H-21 movement, this high-performance automatic chronograph can rely on 60 hours of power reserve. Modernity is king in the confidently contemporary shaping of the case and the dial design. In its entirety, the Hamilton Jazzmaster Auto Chrono is a picture of sophistication that masters usability and reliability.

Detail shapes design

Special shaping of the antireflective sapphire crystal enables maximum dial visibility, subtly guiding the eye to the three counters. These are grouped on the left to allow the date display at 4 o'clock optimal exposure. Tapered pushers elegantly mirror the lugs' form and the required love of detail also finds expression in 'Clous de Paris' dial decoration. Styling choices enable the Hamilton Jazzmaster Auto Chrono to harmonize with the rhythms of diverse lifestyles. A new five-row stainless steel bracelet for instance merges seamlessly into the contemporary case. While rose gold-colored indexes bring warm tones to a version with a silver dial and crocodile-pattern brown leather strap. The five-strong family is equipped to satisfy different wearer types, united by their zero-tolerance attitude with regard to timekeeping accuracy and material quality.

Hamilton was founded in 1892 in Lancaster, Pennsylvania, USA. Hamilton watches combine the American spirit with the unrivalled precision of the latest Swiss movements and technologies. Known for its innovative design, Hamilton has a strong foothold in Hollywood, with products appearing in 400 films. The brand also boasts a strong aviation heritage. Hamilton is a member of the Swatch group, the largest watch manufacturer and distributor in the world with 160 production sites in Switzerland.
