

BIJOUMONTRE

Guardian Star Collection

The BijouMontre Guardian Star Collection perfectly embodies the most representative Notre Dame de Paris with unique cushion cases and longitudinally symmetrical lugs, inspired by carefully and perfectly symmetric Gothic architecture.

With immortal wisdom, the magnificent Notre Dame de Paris gazes at the elegant Seine in silence. It guards every person in the world with persistent tenderness.

The BijouMontre Guardian Star Collection perfectly embodies the most representative Notre Dame de Paris with unique cushion cases and longitudinally symmetrical lugs, inspired by carefully and perfectly symmetric Gothic architecture. Originating in the 12th century, Gothic architecture is known as the most prominent example of French architecture style and praised by its beauty of symmetry as well as nobility. The design of the arch-shaped lugs is inspired by the Gothic arch; the embedded Top Wesselton / VS diamonds are splendid as well as elegant; the circular design of indexes and centers on the dials are just like the well-known rose window of Notre Dame de Paris; the combined small seconds increase the practicality, and the mother-of-pearl dials balance out the indexes; together, the collection demonstrates a sense of brightness and artistic delicacy. The designer, by means of her unique perspective, concisely portrays this representative architecture of French civilization and presents this beautiful collection, in which classical and modern style perfectly combine.

TECHNICAL SPECIFICATIONS

BM 56010T / BM 56030T
