Since 2001, our independent company manufactures Swiss Made mechanical movements : - Manual and Automatic Movements - Tourbillon Movements - Big date and Dual-Time Modules, Power-Reserved-Indicators, Retrograde-Date ... etc All of our movements offer an original architecture with a Twin Mainspring Barrel Design. One particular design is utilized in high-end, well renowned, watch brands. This design offers a Five-Day Power Reserve! In addition, the Twin Mainspring Barrel Design results in an optimal torque for driving complications. Technotime movements are customizable mechanically and decoratively. As a result, brand differentiation is simple. To guarantee the continuity of delivery, Technotime belongs to the "closed club" of the Swiss hairspring manufacturers. All Technotime movements include their "in house" hairspring and can be COSC chronometer certified.
